

Critical Communications

Seamless solution for schools and districts

From the district office to each and every classroom, facilities benefit from a network-based platform designed to keep everyone connected while still meeting the specific needs of the schools.

Telecenter U works with the school's data network, providing a seamless communications solution for every school and every system in the district — from IP addressable speakers in classrooms to a web-based user interface.

-  **Emergency Response:** district-wide and school-wide automated notification
-  **Event Management:** web-based bells and scheduled events
-  **Everyday Communications:** announcements and two-way calling to classrooms

Emergency Response

Telecenter U helps deliver automated critical notifications for a wide range of emergencies, whether for a lock-down, lock out or weather.

- Pre-record messages for different crisis scenarios
- Enable students and faculty to take action quickly
- Initiate immediate notifications from a phone, Telecenter U console, mobile app, web browser or panic button

Additional Telecenter U features include:

- District-wide and school-wide notifications
- Emergency check-ins that notify staff which classrooms haven't locked down
- Single web-based interface
- Calls from classrooms that keep annunciating until they are answered

Event Management

Make managing schedules virtually effortless.

- Easy time management, from ringing bells to synchronizing clocks
- Every schedule for every school can be managed from anywhere on the network
- Dependable schedules help students, teachers, staff and parents have a smooth school day

Easily manage calendars and schedules district-wide with user-friendly web browser interface.

- Class change tones
- Pre-recorded messages
- Holidays, snow days and other school closings
- Adapted schedules
- Play music in hallways before and after school and during passing periods

Everyday Communications

Telecenter U keeps every day running smoothly with a fully integrated system.

- Paging, intercom, bells and clocks
- Allow teachers to get assistance without disturbing teaching with call buttons
- Route internal communications to the right people
- Classroom call buttons allow teachers to get assistance without disturbing teaching

Live communication is simple and targeted – to a single location, a group of facilities or the entire district. All day, every day.

- Manage multi-school campuses with ease
- Easily communicate to the entire school quickly and easily from a phone, console or microphone

Flexible Migration Options

Telecenter U is designed to allow school districts to invest in future communications technologies at their own pace:

- 1 Overlay to legacy systems
- 2 Hybrid without network upgrades
- 3 Full IP solution
- 4 Visual Communications
